SELENIUM

Handle Mouse Hover in Selenium

- Handle Mouse & Keyboard Events in Selenium.
- **Actions** class in Selenium supports to perform all the operations related with mouse and keyboard.
- Action Class will not help to Switch Window/Tab like we can do with ctrl+Tab key.
- Builder Pattern : Builder Pattern is used to build the composite pattern to perform some action. In Action class that can be completed by build() method.
- This means that we can build up a nice sequence of operations, for example, "Press Shift key and type something and then release"
