WebElement in Selenium

Selenium: Selenium With Java Basics

- **WebElement** : Anything present on the webpage such as textbox, text, button, link, table, radio button, checkbox etc, are called as webelement.
- What is the Importance of WebElement in Selenium.
- The object we used to Identify and work on Web-Element is called Locator.
- Discuss WebElement Interface.
- WebElement can be created by findElement() and findElements() method of WebDriver.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the cursive word 'Thank you!' on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker's tip is just finishing the exclamation mark. The background is a plain, light-colored surface.
