

# SELENIUM

.....

*Verify Element Visibility on WebPage*

## *Selenium: Selenium With Java Basics*

---

- Verify Visibility of Web-Element on Web-Page
- `isDisplayed()` : is the method used to verify presence of a web element within the webpage.
- Returns 'true' if element is displayed or false if element is missing on web-page.
- `isEnabled()` : is the method used to verify if the web element is enabled or disabled within the webpage.
- Returns 'true' if element is enabled or false if element is not enabled on web-page.

## *Selenium: Selenium With Java Basics*

---

- `isSelected()` : is the method used to verify if the web element is selected or not.
- `isSelected()` method is pre-dominantly used with radio buttons, drop-downs and checkboxes.
- Returns 'true' if element is Selected or false if element is not Selected on web-page.

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, completing the cursive word 'Thank you!' on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker's tip is just finishing the exclamation mark. The background is a plain, light-colored surface.
