.....

Close vs Quit

Selenium: Selenium With Java Basics

- We have multiple ways to Close the Browser in Selenium.
- **Close() method**: This method closes the Currently open browser window or the browser window which is in focus.
- **Quit() method**: This method close the all open **instances of the Browser**.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the cursive word 'Thank you!' on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker's tip is just finishing the exclamation mark. The background is a plain, light-colored surface.
