Waits and Timeout in Selenium 4

Java/Selenium Testing Framework Automation

➢ **Waits in Selenium 4** : Selenium 3 wait methods are deprecated in Selenium 4.

➢ In Selenium 4, the parameters received in Waits and Timeout have changed from expecting (long time, TimeUnit unit) to expect (Duration duration)

➢ **Implicit Wait in Selenium 4**
   ○ Before Selenium 4
      driver.manage().timeouts().implicitlyWait(10, TimeUnit.SECONDS);

   ○ After Selenium 4
      driver.manage().timeouts().implicitlyWait(Duration.ofSeconds(10));

➢ **Explicit Wait in Selenium 4**

- ○ Before Selenium 4
  WebDriverWait wait = new WebDriverWait(driver,10);

- ○ After Selenium 4
  WebDriverWait wait = new WebDriverWait(driver,Duration.ofSeconds(10));

Thank You...

Don't be the Same! Be Better!!!
