# SELENIUM

*Handle Multiple Browser Windows/Tabs*

➤ Sometimes we have some links which Opens the Web-page on new Tab or in New Window.

➤ In selenium, We need to switch to window/tab on which we want to Work.

➤ Selenium Provides Native Support to handle the Multiple Windows.

➤ Selenium Use GUID to identify the application and work on it.

➤ Methods to Work with Multiple Windows:

➤ getWindowHandle()

➤ getWindowHandles()

➤ switchTo().window()
