SELENIUM

Select Class in Selenium

➤ Selenium webdriver provides Select class, with help of select class we can handle drop-downs on the webpage.

➤ Steps to select a value in dropdown in selenium webdriver:

1. Find the dropdown using findElement
2. Create object for **Select** class passing dropdown element as parameter
3. Select the value from the dropdown values

➤ There are two types of dropdowns :

1. Single value Dropdown
2. Multi Value Dropdown

➤ Methods in Select Class:

➤ selectByIndex(int index)

➤ selectByValue(String value)

➤ selectByVisibleText(String text)

➤ getOptions()

➤ getFirstSelectedOption()

➤ getAllSelectedOptions()

➤ isMultiple()

➤ deselectByIndex(int index)

➤ deselectByValue(String value)

➤ deselectByVisibleText(String text)

➤ deselectAll()
